

Architectural Stainless on **Grand Designs**

In September 2010 we were approached by Ben Coode-Adams and Freddie Robins to fabricate and supply the stainless steel for the futuristic roofing structure on their 500 year old barn conversion.

This we did with a very quick turnaround due to the oncoming very harsh winter and at a very competitive price and although we are predominately swimming pool specialists it shows we can turn our hand to anything in stainless steel.

So if you require absolutely anything in stainless steel please do not hesitate to contact us.

In the meantime here is a link to the Grand Designs Braintree episode webpage below
